

Search Engine

A simple search engine with ranking and
graphic interface

Written 100% in
python

Parsing

Reading .xml files

- ❖ **library** :ElementTree

Separate title, body and url

- ❖ **library** : BeautifulSoup
- ❖ **Challenge:** some websites didn't have title

Remove tags and sort text

- ❖ **library** : BeautifulSoup
- ❖ **Challenge:** Some signs that were not tagged remain

Functions:

Indexing

Calculating TF-IDF :

- ❖ Title : `title_tfidf [(doc1,token : tfidf),(),()]`
- ❖ Body : `body_tfidf [(doc1,token : tfidf),(),()]`

Formula :

$$\text{TF-IDF} = \text{body_tf-idf} * \text{body_weight} + \text{title_tf-idf} * \text{title_weight}$$

Alpha : weight of body

1- Alpha = weight of title

Ranking

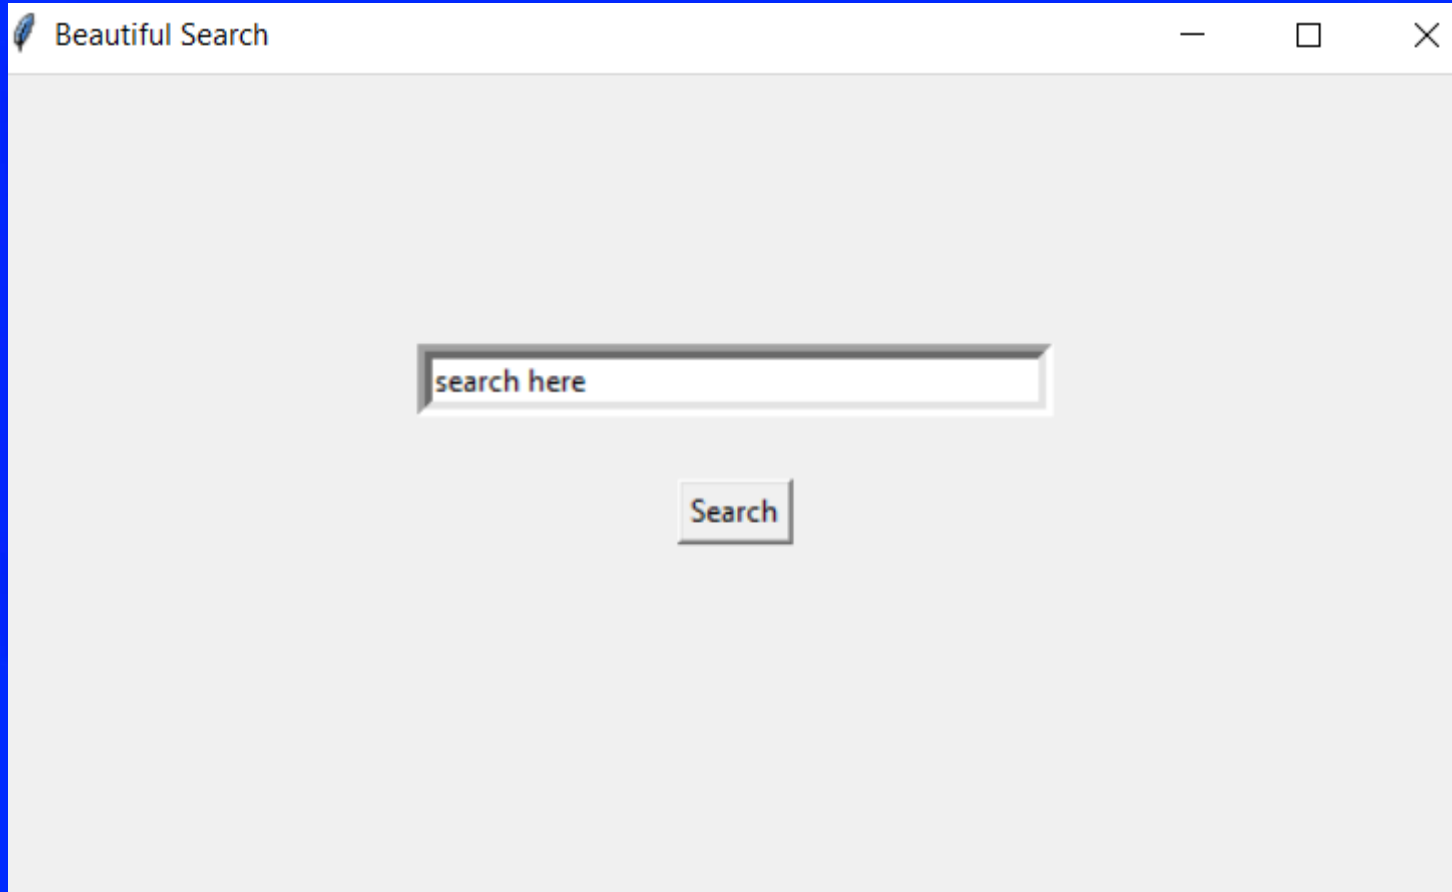

Ranking:

- ❖ Matching Score
- ✓ Cosine Similarity

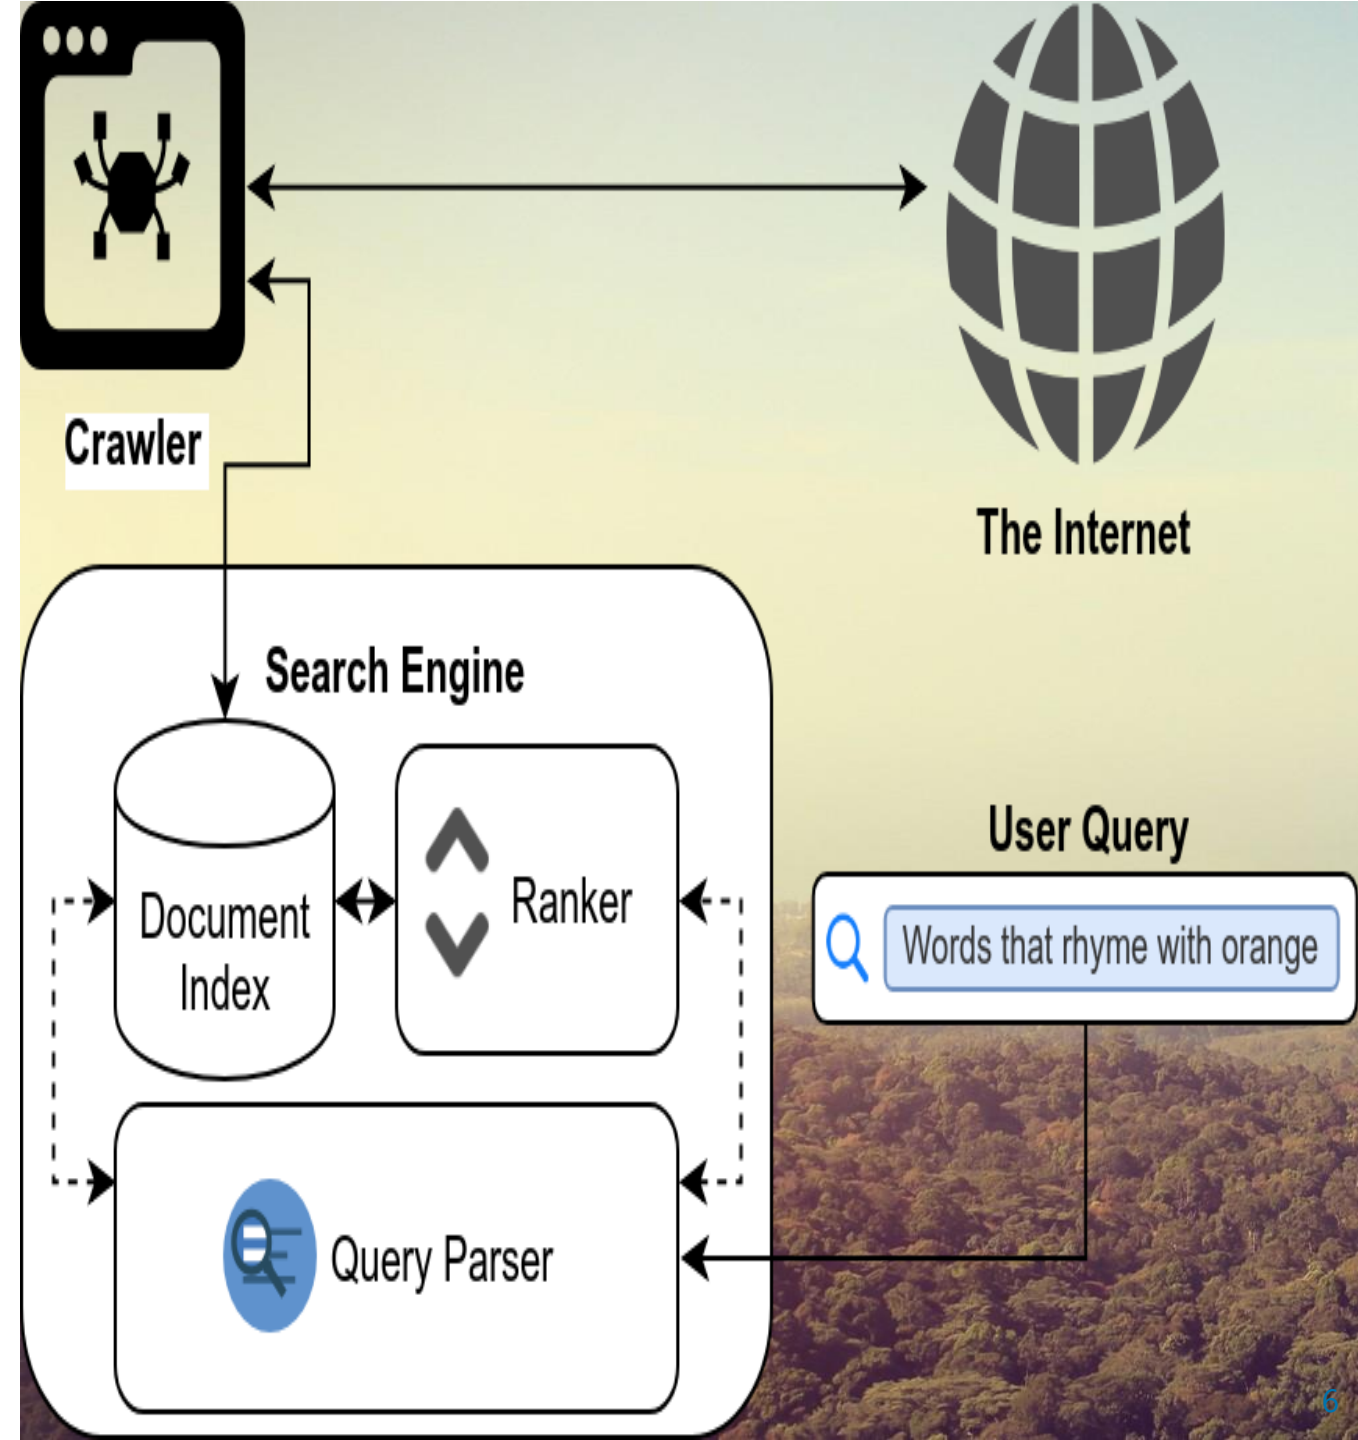

GUI

From tkinter library

Challenges :

1. The sites are Persian
2. The content of the sites is the same
3. Most of the links are dead
4. Data volume

A person is sitting on the edge of a rocky cliff, looking down at a smartphone. The background shows a vast, hilly landscape under a clear sky. A large, light blue circle is overlaid on the image, centered on the person. A smaller, solid yellow circle is positioned near the center of the large circle, slightly to the right.

Thank you
